- take first steps to source sustainable palm oil by offsetting our palm oil footprint via a Book & Claim mechanism.
- start to engage our direct suppliers to progressively source 100% certified sustainable palm oil.
- we will consider joining SASPO (South East Asian Alliance for Sustainable Palm Oil) and make use of the free consulting services to prepare our sustainability roadmap and ensure transparency on the above pledge.

I hereby declare that I will abide by the pledge above and have the authority to sign this pledge for the above-mentioned company.
